STAIRNOSING 15 series-stair nosing is suitable for all surfaces

Product Data Sheet 508 inlay

508 inlay is suitable for installation in pre-grooved timber or concrete stairs. The 508 inlay can also be used as a lead in edge. It is made of a composite material with hard wearing silicon carbide anti slip grit. The inlay is 50mm wide x 8mm thick and is available in black.

The material is suitable for high exposure to salt water and offers Class P5 Slip Resistance as per AS 4586.2013. SC-R 508 inlays are supplied cut to size in maximum 4 meter lengths.

Installation—Grooved Step

The groove in the stair can be set back at a maximum of 15mm from the front edge of the step. The groove should be 52mm wide x 8mm deep. The inlay is glued into the groove using a polyurethane based adhesive. (typical glues are: Sikaflex 11FC, Soudal T-Rex or RiteTack.
